THIS IS UNEVALUATED INFORMATION

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS REPORT IS PROHIBITED.

1. From 1 through 22 Apr 54, seventeen transmitter tubes, types HF 2825 and HF-2958, were manufactured by the HF Works, Berlin-Oberschöneweide. Production, however, was inadequate to supply the demand from the RFT Radeberg. Monthly production of these tubes is to be raised to 60 by the end of June 1954.
2. Altogether, 327 high quality transmitter tubes were manufactured in March 1954. Production of MK tubes in March was about 2,600. Tubes of this kind were delivered to the Friedrichshafen Volkspolizei for the first time. Production of receiver tubes continues normal, notwithstanding the fact that material shortage have become noticeable. The stock of anode sheet will not last beyond the end of April. The Buntmetallwerk Hettstedt is not able to supply requirements. There is a shortage of filament for senders. Production of LS 50 tubes was 360 from 1 Mar to 8 Apr 54.
3.
4. The RFT Leipzig delivered 800 photoelectric cells to the HF works. What they are for is not yet known.
5. Hungary has announced its readiness to deliver powdered iron to the DDR (Soviet Zone) after 1 Jul 54.
